

MIHIR RAVINDRA ADELKAR

617-487-2363 | adelkar.mihir@gmail.com | linkedin.com/in/mihir-adelkar | github.com/mihiradelkar

Front-End Software Engineer with 3+ years building data-intensive React/TypeScript dashboards and reusable design system component libraries for 500K+ users. Daily user of AI coding assistants (Claude Code, Copilot) for multi-file refactors, scaffolding, and complex UI logic. Shipped open-source micro-frontend boilerplates adopted by 15+ teams.

EDUCATION

Northeastern University

Master of Science in Software Engineering Systems

Boston, MA

Sept 2023 – May 2025

TECHNICAL SKILLS

Front-End: React, Next.js, TypeScript, JavaScript, Redux, React Query, SASS, Tailwind, Material-UI, Storybook, Vite
UI/UX & Data: Figma, WCAG, Responsive, PWA, SSR/SSG, Core Web Vitals, SVG, Lighthouse, WebSockets
Testing & AI Tools: Jest, React Testing Library, Cypress, ESLint, SonarCloud, Claude Code, Copilot, RAG, MCP
Back-End & APIs: Node.js (Express), Django, FastAPI, REST, GraphQL, gRPC, PostgreSQL, MongoDB, Redis
Cloud & DevOps: AWS, GCP, Docker, Kubernetes, Terraform, GitHub Actions, Jenkins, Prometheus, Grafana

EXPERIENCE

Full-Stack Developer

KeelWorks Foundation

Aug 2025 – Present

Boston, MA

- Own front-end development of KeelCompass, an internal workforce engagement platform; ship responsive React + TypeScript UI with reusable components, partnering with PM and design to translate Figma mockups into UI
- Integrated Claude Code workflow for component scaffolding, multi-file refactors, and complex state logic, critically reviewing AI-generated output for correctness, performance, and accessibility before merge
- Built reusable component library with coding standards adopted across the team, cutting repeated UI patterns and reducing onboarding time; automated deploys on AWS EKS with GitHub Actions, unblocking same-day releases

Software Engineer

Freelancing (Dabadu.ai)

May 2023 – Sep. 2023

Remote

- Resolved production UI defects across XRM automotive dealership CRM (React/Next.js); diagnosed client-side rendering issues with React DevTools, restoring reliable deployments for live dealership operations
- Refactored legacy JavaScript to TypeScript and introduced Cypress regression suites with SonarCloud quality gates, reducing production bugs 20%

Software Engineer

NeoSOFT Technologies

Jun. 2021 – May 2023

Mumbai, India

- Built open-source front-end boilerplates – mf-shell (Webpack Module Federation enabling micro-frontend composition) and Console (multi-tenant admin panel with RBAC, atomic-design React components, Storybook docs); adopted as org-wide scaffolding standards by 15+ internal teams
- Architected Next.js analytics dashboard with Django aggregation backend, visualizing per-student classroom data – enabled teachers to monitor live attendance, quiz scores, and engagement during class with post-session reports
- Audited 500K+ user real estate CRM; coordinated 20+ engineers over 6 months migrating 12 services, 7x faster inter-service calls, 45%+ infra cost reduction; redesigned front-end to consume new standardize APIs with Redux
- Engineered Homepage Builder CMS for Nesto using React and Node.js with drag-and-drop interface, enabling marketing to independently update pages and promotions without engineering intervention
- Shipped PWA features (SSR, dynamic imports, image optimization) reducing page loads 40% and improving Lighthouse scores; built WCAG-compliant components with full keyboard navigation and screen-reader support
- Translated Figma designs into pixel-perfect, responsive HTML5/CSS3 interfaces across Chrome, Safari, Firefox, and Edge; implemented dynamic SVG visualizations for interactive dashboards
- Established Jest/Cypress test automation reaching 85% UI coverage; integrated into CI/CD with mandatory tests and New Relic APM dashboards, cutting MTTR from 25 to 15 minutes
- Mentored 8 junior developers on React patterns, component design, and through code reviews and bi-weekly knowledge-sharing seminars

RECENT PROJECTS

Healthcare Prior Authorization AI | *React, TypeScript, FastAPI, Claude API, MCP, FHIR R4, Pinecone*

- Built front-end review console with confidence-score visualizations and audit-trail UI, enabling reviewers to prioritize high-value insurance claims; system replaces 3–5 day manual reviews with 5–10 sec automated decisions
- Designed MCP architecture for context-aware LLM reasoning combining patient data with insurance policy documents; clinical NLP pipeline maps unstructured notes to FHIR with 95%+ extraction accuracy on test dataset

CVE Intelligence System | *Go, React, Kafka, Pinecone, Llama 3, AWS EKS, Terraform*

- Built distributed microservices for real-time CVE ingestion with Kafka streaming; developed RAG pipeline enabling engineers to query vulnerabilities in plain English instead of manual NVD searches
- Deployed on AWS EKS with Terraform IaC and Istio service mesh; implemented Prometheus/Grafana monitoring with automated alerting and Jenkins CI/CD pipeline
