Summary

Software Engineer with 3+ years designing and maintaining CI/CD pipelines, container orchestration, and cloud infrastructure. Hands-on experience with Azure DevOps, Kubernetes, and IaC using Terraform. Deployed ML models on Kubernetes clusters with observability pipelines. Strong scripting skills in Python, Bash, and PowerShell with a focus on automation and security compliance.

Skills

Languages	Python, Bash/Shell, PowerShell, Groovy, YAML, Go, Java, JavaScript/TypeScript
DevOps	AWS (EKS, EC2, S3, RDS, IAM), GCP, Azure, Azure DevOps, GitHub Actions, Jenkins, Secrets Management
IaC & Config	Terraform (modules, state management), Helm Charts, Docker, Packer, Ansible, RBAC, Network Policies, Encryption
Containers	Kubernetes (EKS/GKE/AKS), Docker, Container Registries, Istio Service Mesh, Pod Autoscaling
AI/ML Ops	LLM Deployment (Llama 3), ML Pipelines, Model Serving, RAG Systems, MCP Architecture, Vector DBs (Pinecone)
Observability	Prometheus, Grafana, New Relic, OpenTelemetry, K6 Load Testing, Log Analytics, Alerting

Professional Experience

Full Stack Developer, KeelWorks Foundation — Boston, MA Aug 2025 – Present

- Building workforce engagement platform with React/TypeScript frontend and Node.js microservices on PostgreSQL.
- Deploying containerized services on **AWS EKS** with Docker and **Terraform**; implementing **CI/CD pipelines** with GitHub Actions.
- Configuring **observability stack** with Prometheus and Grafana dashboards for real-time monitoring and alerting.

Software Engineer, Freelancing (Dabadu.ai) — Kitchener, ON (Remote) May 2023 – Sept 2023

- Contributed to automotive dealership CRM with React/Node.js; stabilized production services on AWS.
- Established **CI/CD pipelines** with SonarCloud quality gates and Cypress automated testing, reducing deployment failures by 20%.
- Configured container orchestration and deployment automation for Node.js microservices architecture.

Software Engineer, NeoSOFT Technologies — Mumbai, India Jun 2021 – May 2023

- Built full-stack applications using React, Node.js, Django, and Spring Boot across CRM, analytics platforms serving 500K+ users.
- Managed source code in **Azure DevOps Repos**; designed **CI/CD pipelines** for build, test, and release automation.
- Utilized **Azure Boards** for sprint planning and Kanban workflows; tracked work items with pipeline integration.
- Led migration from monolith to **Docker containerized microservices**; deployed on AWS EKS using **Terraform** modules.
- Automated tasks with **Python, Bash, and PowerShell** scripts including shift availability checks and monitoring alerts.
- Established **observability** with Prometheus, Grafana, and New Relic; reduced mean-time-to-recovery from 25 to 15 minutes.
- Implemented **RBAC** and secrets management with IAM policies; reduced deployment time by **80%**.
- Mentored 8 junior developers** through code reviews and technical guidance in Agile sprints.

Projects

CVE Intelligence System — ML Model Deployment on Kubernetes Go, Python, Terraform, Kubernetes, Kafka, Prometheus

- Deployed **Llama 3** LLM on Kubernetes (EKS) with autoscaling; built RAG pipeline with Pinecone DB for AI-powered queries.
- Automated infrastructure provisioning with **Terraform modules** managing EKS clusters, networking, and IAM policies.
- Implemented **CI/CD with Jenkins and GitHub Actions**; automated Docker builds, Helm deployments, and semantic versioning.
- Configured **Istio service mesh** for secure inter-service communication; implemented network policies and mTLS encryption.
- Established **Prometheus/Grafana observability** with custom dashboards, alerting rules, and SLO tracking for 99.9% availability.
- Built **Kafka-driven data pipeline** for real-time CVE processing with schema validation and dead-letter queue handling.

Cloud-Native Application Platform Terraform, Kubernetes, Jenkins, Packer, GCP

- Developed cloud-native infrastructure with **Terraform IaC**; configured auto-scaling groups and load balancers for 99.9% uptime.
- Created custom **machine images with Packer**; automated AMI/image builds integrated into CI/CD pipelines.
- Implemented **VPC networking**, firewall rules, and IAM policies for secure, compliant cloud architecture.
- Automated deployment workflows with **GitHub Actions**, reducing provisioning time by 90%.

Enterprise Analytics Platform (Pedgog) Kubernetes, Terraform, Jenkins, New Relic, K6

- Deployed high-volume analytics platform on **Kubernetes** with Terraform-managed infrastructure and Jenkins CI/CD pipelines.
- Implemented **APM** with New Relic; created dashboards for peak activity identification and capacity planning.
- Conducted **load testing with K6** to validate autoscaling; documented runbooks for incident response and scaling procedures.

Multi-Tenant SaaS Infrastructure Docker, Kubernetes, GitHub Actions, Keycloak

- Architected **containerized multi-tenant platform** with Docker and Kubernetes for isolated, scalable deployments.
- Implemented **RBAC with Keycloak** for identity management and SSO integration across tenant environments.
- Established **CI/CD pipelines with GitHub Actions** for automated testing, image builds, and multi-environment deployments.

Education & Certifications

Master of Science in Software Engineering Systems — *Northeastern University, Boston, MA* Sept 2023 - May 2025

Relevant Coursework: Advanced Cloud Computing, Distributed Systems, Algorithms, Big Data Systems

Bachelor of Engineering in Computer Engineering — *University of Mumbai, Mumbai, India* Aug 2018 - Jun 2021

Certifications: Certified Java Enterprise Applications Developer (Oracle) | OOP Using C++ (NIIT) | Foundational AI (SkillUp)
