Summary

Frontend Software Engineer with 3+ years delivering scalable, accessible, and high-performance web platforms. Specialize in building React/Next.js + TypeScript applications with reusable design-system components, PWAs, and test-driven development. Improved page loads by 40%, boosted engagement by 20%, and achieved 85% UI test coverage with Cypress in CI/CD pipelines.

Skills

Frontend	React, Next.js, TypeScript, JavaScript (ES6+), Redux, Material-UI, Tailwind CSS, SASS, HTML5/CSS3, Storybook
Performance	Core Web Vitals, Lighthouse, Bundle Optimization, Code Splitting, Lazy Loading, PWA, SSR/SSG, Vite
Testing	Jest, Cypress, React Testing Library, TDD, Visual Regression, E2E Testing, SonarCloud, Code Reviews
Backend	Node.js (Express/NestJS), Python (Django/Flask), Java (Spring Boot), RESTful APIs, GraphQL, WebSockets
Cloud & DevOps	AWS (S3, CloudFront, EKS), Docker, Kubernetes, Terraform, Jenkins, GitHub Actions, CI/CD Pipelines
Tools	Git, Figma, Webpack, npm/yarn, ESLint/Prettier, Prometheus, Grafana, New Relic, Accessibility (WCAG)

Professional Experience

Full-Stack Developer, KeelWorks — Boston, MA

Aug 2025 – Present

- Leading frontend development of workforce engagement dashboards using **React**, **TypeScript**, and modular UI components.
- Implemented **PWA features**, lazy-loading, and optimized bundle sizes, reducing page load times by **30-35%**.
- Built reusable **component libraries** to streamline development and ensure consistency across multiple internal tools.
- Collaborating with designers and backend engineers in **Agile sprints** to ship new features rapidly and iterate on feedback.

Frontend Engineer (Freelance), Dabadu.ai — Remote

May 2023 – Sept 2023

- Built and optimized dealership CRM UIs in **React/Next.js**, improving navigation speed and user workflows.
- Refactored legacy JavaScript to **TypeScript**, reducing bundle size by **25%** and improving maintainability.
- Strengthened frontend quality by adding **Cypress** regression suites and **SonarCloud** checks, reducing bugs by **20%**.

Software Engineer, NeoSOFT Technologies — Mumbai, India

Jun 2021 – May 2023

- Designed responsive **React/Next.js** UIs with reusable component libraries, improving consistency across 5+ projects.
- Converted legacy applications into **PWAs** with SSR/SSG, enhancing SEO and reducing page load times by **40%**.
- Built **component library** in **Storybook** and published npm packages, reducing code duplication across teams.
- Implemented modular frontend architecture with **Redux**, **Material-UI**, and **Tailwind**, enabling faster feature delivery.
- Wrote **Cypress/Jest** test suites integrated with CI/CD pipelines, achieving **85% UI test coverage**.
- Integrated **GraphQL** and REST backends; adopted **React Query** for caching, pagination, and optimistic updates.
- Instrumented analytics and observability (New Relic, Prometheus/Grafana) to monitor user behavior and performance.
- Ensured **WCAG** compliance across applications; implemented keyboard navigation and screen reader support.
- Optimized **Core Web Vitals** and implemented **A/B testing** for UI experiments, improving conversion rates.
- Collaborated with Product, Design, and UX teams in Agile sprints; **mentored 8 junior developers** on frontend best practices.

Projects

Micro-Frontend Architecture Boilerplate

TypeScript, React, Webpack Module Federation, Jest, Cypress

- Architected modular **micro-frontend** system enabling independent deployment of UI components across applications.
- Implemented **Webpack Module Federation** for runtime code sharing, reducing bundle duplication across shared surfaces.
- Established comprehensive testing scaffolds with **Jest** and **Cypress**; adopted by **15+ teams** for production use.

Pedgog — Learning Analytics Platform

Next.js, Django, PostgreSQL, Firebase, AWS S3, Kubernetes

- Developed interactive **Next.js** dashboards with **SSR**, improving navigation and retention by **30%**.
- Built responsive UI components for quizzes and discussion boards to enhance student engagement.
- Implemented real-time monitoring with **New Relic** and **K6** load tests to optimize performance and guide autoscaling.

Multi-Tenant CRM Platforms (Wasalt/Nesto)

React, TypeScript, Node.js, Spring Boot, PostgreSQL, Redis, WebSockets

- Built responsive **React/TypeScript** frontends for property listings and vendor dashboards with real-time **WebSocket** updates.
- Implemented **Redux** state management with optimistic updates and client-side caching for improved UX.
- Collaborated with backend teams to integrate **REST/GraphQL** APIs with proper error handling and loading states.

UniNest — Roommate Matching Platform

React, TypeScript, Node.js, MongoDB, WebSockets, GCP

- Designed intuitive **React + Material-UI** interfaces with Google Maps and Firebase integration.
- Implemented real-time chat using **WebSockets** with typing indicators and message delivery status.
- Added **i18next** internationalization and accessibility checks to serve diverse user bases.

Open Source Contributions

GitHub: NeoSOFT-Technologies

- Multi-Tenancy Admin Console**: SaaS admin portal with RBAC, Keycloak SSO, Next.js UI; Docker containerized with CI/CD.
- React Component Library**: Published reusable UI components with TypeScript, Storybook documentation, and theme support.

Education & Certifications

Master of Science in Software Engineering Systems — Northeastern University, Boston, MA

Sept 2023 - May 2025

Bachelor of Engineering in Computer Engineering — University of Mumbai, Mumbai, India

Aug 2018 - Jun 2021

Certifications: Certified Java Enterprise Applications Developer (Oracle) | OOP Using C++ (NIIT) | Foundational AI (SkillUp)
