Summary

Software Engineer with 3+ years building scalable applications. Expert in full-stack development with a strong foundation in object-oriented design and cloud infrastructure. Proven track record architecting microservices, implementing AI/LLM solutions, optimizing performance, and implementing comprehensive testing. Strong focus on clean architecture and DevOps automation.

Skills

Frontend	React, Next.js, Angular, TypeScript, Redux, Material-UI, Tailwind CSS, HTML5/CSS3, Responsive Design
Backend	Node.js (Express/NestJS), Python (Django/Flask/FastAPI), Java (Spring Boot), Go, RESTful APIs, GraphQL, gRPC
AI & LLMs	Claude API, LLM Integration, MCP, RAG Patterns, Prompt Engineering, Vector Databases (Pinecone)
Databases	PostgreSQL, MySQL, MongoDB, Redis, DynamoDB, Kafka, Query Optimization, Schema Design
Cloud & DevOps	AWS (EKS, Lambda, RDS, S3), GCP, Docker, Kubernetes, Terraform, Jenkins, GitHub Actions, CI/CD
Testing	Jest, Cypress, JUnit, React Testing Library, TDD, K6 Load Testing, Prometheus, Grafana, New Relic

Professional Experience

Full-Stack Developer, KeelWorks — Boston, MA Aug 2025 – Present

- Developing workforce engagement platform using **React/TypeScript** frontend and **Node.js** microservices with PostgreSQL.
- Building reusable component libraries and establishing coding standards for distributed development team.
- Deploying containerized services on **AWS EKS** with Docker/Terraform, implementing **CI/CD** with GitHub Actions.

Software Engineer, Freelancing (Dabadu.ai) — Remote May 2023 – Sept 2023

- Contributed to production automotive dealership CRM with **React/Node.js**, implementing real-time features using **WebSockets**.
- Refactored legacy JavaScript to **TypeScript**, reducing bundle size by 25% and improving maintainability.
- Established **Cypress** E2E testing and **SonarCloud** quality gates, reducing production bugs by 20%.

Software Engineer, NeoSOFT Technologies — Mumbai, India Jun 2021 – May 2023

- Architected full-stack applications using **React**, **Node.js**, **Django**, and **Spring Boot** across CRMs, Analytics and internal dev tools.
- Led redesign of monolithic application into **Docker containerized microservices**, reducing deployment time from 2 hr to 25 min.
- Designed **RESTful and GraphQL APIs** with PostgreSQL/MongoDB; added **Redis caching** reducing API response times by **70%**.
- Implemented **Kafka** for async processing (email/push notifications) and **gRPC** for low-latency inter-service communication.
- Built **component library** in Storybook and published npm packages, reducing code duplication and used across 5+ projects.
- Set up **Jest/Cypress** test automation achieving **85% coverage**; established **CI/CD pipelines** with Jenkins and GitHub Actions.
- Added observability with **Prometheus/Grafana** and **New Relic**, reducing mean-time-to-recovery from 25 to 15 minutes.
- Mentored 8 junior developers** through code reviews, pair programming, and technical guidance in Agile sprints.

Projects

Healthcare Prior Authorization AI System Python, FastAPI, Claude API, FHIR, Streamlit, Tesseract OCR

- Engineered AI system transforming **3-5 day** manual healthcare prior auth reviews into automated **5-second decisions**.
- Architected clinical **NLP pipeline** with **FHIR** resource mapping, extracting structured medical data with **95%+ accuracy**.
- Designed **Model Context Protocol (MCP)** architecture for intelligent context management with LLM-based decision making.

CVE Intelligence System — AI-Powered Security Assistant Go, Node.js, PostgreSQL, Kafka, AWS EKS, Terraform

- Built distributed **microservices** for real-time CVE data processing using **Kafka** message streaming.
- Developed **RAG (Retrieval-Augmented Generation)** pipeline with **Pinecone vector DB** and **Llama3 LLM**.
- Implemented **Istio service mesh** with automated Infra using **Terraform** and established monitoring with **Prometheus**.

Multi-Tenant CRM Platforms (Wasalt/Nesto) React, TypeScript, Spring Boot, Node.js, AWS Lambda, PostgreSQL, Kafka, Redis

- Architected multi-tenant CRM with **Spring Boot/Node** microservices and **IAM/RBAC** supporting **50+ roles** with tenant isolation.
- Implemented **Kafka** event streaming, **gRPC** for inter-service communication, and **Redis** caching achieving **sub-100ms** responses.
- Built responsive **React** UI with real-time **WebSocket** updates; integrated serverless with **Lambda** reducing infra costs by 25%.

Pedgog — Learning Analytics Platform Next.js, Django, PostgreSQL, Firebase, AWS S3, Kubernetes

- Developed an interactive learning platform with quizzes and discussion boards to enhance student engagement in **Next.js**.
- Architected an Analytics Platform with Django for real-time In-Class analytics and SSR custom dashboards for professors.
- Implemented end-to-end API monitoring system with New Relic APM; conducted comprehensive **load testing** with **K6**.

Open Source Contributions GitHub: NeoSOFT-Technologies

- Micro-Frontend Boilerplate**: TypeScript + React + Webpack Module Federation; Jest/Cypress testing, adopted by 15+ teams.
- Multi-Tenancy Admin Console**: SaaS admin portal with RBAC, Keycloak SSO, Next.js UI; Docker containerized with CI/CD.

Education & Certifications

Master of Science in Software Engineering Systems — Northeastern University, Boston, MA Sept 2023 - May 2025

Relevant Coursework: Advanced Cloud Computing, Distributed Systems, Algorithms, Object-Oriented Design

Bachelor of Engineering in Computer Engineering — University of Mumbai, Mumbai, India Aug 2018 - Jun 2021

Certifications: Certified Java Enterprise Applications Developer (Oracle) | OOP Using C++ (NIIT) | Foundational AI (SkillUp)
