Summary

Full Stack Engineer with 3+ years building production-grade web applications with **React/TypeScript** frontends and **Node.js/Python** backend services. Own features end-to-end from technical design through deployment and optimization. Built authentication systems, real-time APIs, and developer SDKs adopted across multiple teams. Hands-on with **EVM chains** (Polygon) and eager to build infrastructure powering the next generation of fintech applications.

Skills

Frontend	React, Next.js, TypeScript, JavaScript, Redux (Toolkit, Thunk, Persist), React Query, Material-UI, Tailwind
State Management	Redux, Redux Toolkit, Context API, React Query, Zustand; complex state patterns in production applications
Backend	Node (Express/NestJS), Python (Django/FastAPI), Go, RESTful APIs, GraphQL, gRPC, WebSockets, OAuth
Web3 & Blockchain	EVM basics, Polygon, Web3.js, Smart Contract Interaction, Hash Verification, Wallet Integration
Databases	PostgreSQL, MongoDB, Redis, DynamoDB, Firebase; schema design, indexing, query optimization
Cloud & DevOps	AWS (EKS, Lambda, RDS, S3), Docker, Kubernetes, Terraform, GitHub Actions, Jenkins, CI/CD
Testing & Quality	Jest, Cypress, React Testing Library, TDD, K6 Load Testing, SonarCloud, Prometheus, Grafana

Professional Experience

Full-Stack Developer, KeelWorks Foundation — Boston, MA

Aug 2025 – Present

- **Own features end-to-end**: from technical design and architecture through implementation, deployment, and optimization.
- Building **React/TypeScript** frontend with complex state management and **Node.js/Express** backend services with PostgreSQL.
- Developing reusable component libraries and internal developer tooling adopted across the distributed engineering team.
- Collaborating cross-functionally with product and design teams to deliver high-impact features in Agile sprints.
- Deploying containerized services on **AWS EKS** with Docker and Terraform; set up **CI/CD pipelines** using GitHub Actions.

Software Engineer, Freelancing (Dabadu.ai) — Remote

May 2023 – Sept 2023

- Contributed to production CRM platform with **React/Node.js**, implementing real-time features using **WebSockets**.
- Worked across **complex, evolving codebase** spanning frontend and backend systems; improved error handling and reliability.
- Refactored legacy JavaScript to **TypeScript** for better maintainability; reduced bundle size by 25%.
- Established **Cypress** E2E testing and **SonarCloud** quality gates in CI/CD pipeline, reducing production bugs by 20%.

Software Engineer, NeoSOFT Technologies — Mumbai, India

Jun 2021 – May 2023

- Built full-stack applications using **React/TypeScript** frontends and **Node.js/Express** backends serving 500K+ users.
- Developed **authentication and authorization systems** with JWT, OAuth2, and Keycloak SSO across multi-tenant platforms.
- Built and maintained **backend services and APIs** supporting user management, role-based access, and real-time features.
- Created **developer-facing SDKs** (npm packages, component libraries) reducing code duplication; adopted by 15+ teams.
- Implemented variety of **state management solutions** (Redux Toolkit, Redux Persist, React Query) for production React apps.
- Designed **RESTful and GraphQL APIs** with PostgreSQL/MongoDB; added Redis caching achieving **70% faster** responses.
- Led migration from monolithic to **Docker containerized microservices**, reducing deployment time by 80%.
- Set up **Jest/Cypress** test automation achieving **85% coverage**; established CI/CD with Jenkins and GitHub Actions.
- Collaborated cross-functionally with product and design partners; **mentored 8 developers** in Agile sprints.

Projects

Document Authenticity Verification System (Blockchain)

Solidity, Polygon, Web3.js, React, Node.js

- Built document verification dApp that calculates file hashes and stores them on **Polygon network** for tamper detection.
- Implemented **smart contract interaction** for on-chain storage and verification of document authenticity.
- Created web interface enabling users to upload documents and verify integrity against **on-chain records**.

Multi-Tenant Authentication Platform (Wasalt/Nesto)

React, TypeScript, Node.js, PostgreSQL, Redis, Keycloak

- Architected **authentication infrastructure** with IAM/RBAC supporting 50+ roles across multi-tenant SaaS platform.
- Built **user-facing and developer-facing features**: admin dashboards, role management APIs, and SSO integration.
- Implemented **Redis** caching and real-time **WebSocket** updates achieving sub-100ms response times.

Developer SDK & Component Libraries (Open Source)

TypeScript, React, Webpack Module Federation, Jest, Cypress

- Created **micro-frontend boilerplate** enabling independent deploys and consistent UI across applications; 50+ stars.
- Published internal **npm packages** (utilities, hooks, design tokens) improving reuse and delivery speed across teams.
- Built **Multi-Tenancy Admin Console** with RBAC, Keycloak SSO; Docker containerized with full CI/CD pipeline.

CVE Intelligence System — RAG-Powered Assistant

Go, Node.js, PostgreSQL, Kafka, AWS EKS, Terraform

- Built distributed **microservices** for real-time data processing using **Kafka** message streaming.
- Developed **RAG pipeline** with Pinecone vector DB and Llama 3 LLM for natural language queries.
- Deployed on AWS EKS with Terraform IaC; configured **Prometheus/Grafana** monitoring and automated alerting.

Pedgog — Learning Analytics Platform

Next.js, Django, PostgreSQL, Firebase, AWS S3, Kubernetes

- Developed interactive platform with **Next.js** frontend featuring complex state management and real-time updates.
- Built backend APIs with Django for real-time analytics; implemented monitoring with New Relic and load testing with K6.

Education & Certifications

Master of Science in Software Engineering Systems — *Northeastern University, Boston, MA*

Sept 2023 - May 2025

Relevant Coursework: Advanced Cloud Computing, Algorithms, Object-Oriented Design, Blockchain Technology

Bachelor of Engineering in Computer Engineering — *University of Mumbai, Mumbai, India*

Aug 2018 - Jun 2021

Certifications: Certified Java Enterprise Applications Developer (Oracle) | OOP Using C++ (NIIT) | Foundational AI (SkillUp)
