Summary

Software Engineer with 3+ years building scalable enterprise applications using Java, Spring Boot, and React.js. Strong experience in microservices architecture, RESTful APIs, and cloud-native deployments on AWS. Oracle Certified Java Developer with proven ability to deliver high-quality software through all phases of the SDLC using Agile methodologies.

Skills

Languages	Java, JavaScript, TypeScript, Python, Go, SQL, Bash/Shell, C++
Frameworks	Spring Boot, Spring MVC, Hibernate/JPA, React.js, Node.js (Express/NestJS), Next.js, Angular, Django, Redux
Databases	PostgreSQL, MySQL, MongoDB, Redis, Oracle; Hibernate ORM, Query Optimization, Schema Design
DevOps	Docker, Kubernetes, Jenkins, Maven/Gradle, Git, GitHub Actions, Terraform, CI/CD, Linux/Unix
Integration	RESTful APIs, GraphQL, gRPC, JSON/XML, Kafka, WebSockets, Microservices Architecture
Testing	JUnit, Mockito, Jest, Cypress, TDD, Performance Testing (K6), SonarCloud, Code Reviews

Professional Experience

Full-Stack Developer, KeelWorks — Boston, MA Aug 2025 – Present

- Developing workforce engagement platform using **React.js** frontend and **Node.js** microservices with PostgreSQL.
- Building reusable components and establishing coding standards aligned with architectural best practices.
- Implementing **RESTful APIs** with proper error handling, validation, and **JSON** data interchange.
- Utilized **Jenkins** for CI and **Git** for version control; led migration to **Docker microservices** reducing deployment time by **80%**.

Software Engineer, Freelancing (Dabadu.ai) — Remote May 2023 – Sept 2023

- Stabilized production services and performed root cause analysis to identify and resolve application issues.
- Integrated third-party APIs with proper error handling, retry logic, and structured logging.
- Established **SonarCloud** quality gates and automated testing, reducing production bugs by **20%**.

Software Engineer, NeoSOFT Technologies — Mumbai, India Jun 2021 – May 2023

- Designed and developed scalable enterprise applications using **Java Spring Boot** and **React.js**, serving **500K+ users**.
- Developed **microservices** integrated with **Kafka** for message processing, handling **1B+ messages** with robust error handling.
- Worked with **SQL databases** for designing, querying, and optimizing complex schemas, ensuring data integrity.
- Created automation scripts in **Unix/Linux** environments to enhance system operations and reduce manual tasks by **40%**.
- Participated in all aspects of the **SDLC**, including analyzing requirements and documenting application specifications.
- Conducted **code reviews** ensuring solutions aligned with architectural standards using **Agile/Scrum** methodologies.
- Mentored 8 junior developers** through pair programming and collaborated with cross-functional teams on project planning.

Projects

Wasalt — Enterprise Real Estate CRM Java, Spring Boot, React.js, PostgreSQL, Kafka, Redis, Kubernetes

- Architected multi-tenant CRM using **Java Spring Boot** microservices with **Kafka** event streaming architecture.
- Designed **PostgreSQL** schemas with **Hibernate ORM**, implementing proper indexing and query optimization.
- Built **RESTful APIs** with comprehensive error handling, validation, and **JSON** data interchange formats.
- Implemented **Redis caching** achieving **sub-100ms** response times for high-traffic endpoints.

CVE Intelligence System — Enterprise Security Platform Go, Java, PostgreSQL, Kafka, AWS EKS, Docker, Kubernetes

- Built distributed microservices for real-time data processing using **Kafka** message streaming with Java integration points.
- Deployed scalable services using **Docker/Kubernetes** with comprehensive monitoring via **Prometheus**.
- Implemented automated **CI/CD pipelines** using **Jenkins** and infrastructure as code with Terraform.

Healthcare Prior Authorization AI System Python, FastAPI, Claude API, FHIR, Streamlit, Tesseract OCR

- Engineered AI system transforming **3-5 day** manual healthcare prior auth reviews into automated **5-second decisions**.
- Architected clinical **NLP pipeline** with **FHIR** resource mapping, extracting structured medical data with **95%+ accuracy**.
- Designed **Model Context Protocol (MCP)** architecture for intelligent context management with LLM-based decision making.

Pedgog — Learning Analytics Platform Next.js, Django, PostgreSQL, Firebase, AWS, Kubernetes

- Developed responsive dashboards with dynamic user interfaces handling **1,500+ concurrent users**.
- Built backend **REST APIs** with complex database operations and caching strategies for real-time analytics.
- Deployed on **Kubernetes** with **Docker** containers and established **CI/CD** using **Jenkins**.

Open Source Contributions GitHub: NeoSOFTTechnologies

- Multi-Tenancy Admin Console:** Enterprise SaaS portal with RBAC, Keycloak SSO; Docker containerized with CI/CD.
- Microservices Boilerplate:** Spring Boot/Node templates with auth, logging, health checks; adopted by 15+ teams.

Education & Certifications

Master of Science in Software Engineering Systems — *Northeastern University, Boston, MA* Sept 2023 - May 2025

Relevant Coursework: Advanced Cloud Computing, Algorithms, Object-Oriented Design, Big Data Systems

Bachelor of Engineering in Computer Engineering — *University of Mumbai, Mumbai, India* Aug 2018 - Jun 2021

Certifications: Certified Java Enterprise Applications Developer (Oracle) | OOP Using C++ (NIIT) | Foundational AI (SkillUp)
