

MIHIR RAVINDRA ADELKAR

617-487-2363 | adelkar.mihir@gmail.com | linkedin.com/in/mihir-adelkar | github.com/mihiradelkar

Full-stack software engineer with 3+ years building production web applications end-to-end. Strong Java and Spring Boot background alongside React, Node.js, and REST API design. Led a ground-up microservices migration across 20+ engineers delivering 45%+ infra cost reduction. Experienced with AWS, PostgreSQL, and full-stack SDLC from requirements through deployment. Excited to apply these skills at the intersection of technology and clean energy.

EDUCATION

Northeastern University

Master of Science in Software Engineering Systems

Boston, MA

Sept 2023 – May 2025

University of Mumbai

Bachelor of Engineering in Computer Engineering

Mumbai, India

Aug 2018 – Jun 2021

TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript, Python, SQL, Shell

Frameworks & Web: Spring Boot, React, Next.js, Node.js, Django, FastAPI, GraphQL, gRPC, jQuery, HTML, CSS

APIs & Data: REST, Ajax, JSON, PostgreSQL, MongoDB, Redis, Kafka, Elasticsearch

Cloud & Infra: AWS (Lambda, S3, EKS), GCP, Docker, Kubernetes, Terraform, Helm, Linux

Tools & Testing: GitHub, Jenkins, IntelliJ, New Relic, Jest, Cypress, Prometheus

EXPERIENCE

Full-Stack Developer

Aug 2025 – Present

KeelWorks Foundation

Boston, MA

- Own end-to-end development of KeelCompass, an internal workforce engagement platform; deliver React UI and Node.js/PostgreSQL microservices partnering with PM and design through full SDLC
- Automated end-to-end deployment pipeline with GitHub Actions on AWS EKS, eliminating manual release steps and enabling same-day deploys for the engineering team
- Delivered reusable component library and coding standards adopted across the team, cutting repeated patterns and reducing onboarding time for new contributors

Software Engineer

May 2023 – Sep. 2023

Freelancing (Dabadu.ai)

Remote

- Resolved production defects across XRM automotive dealership CRM; diagnosed stability issues across multiple modules, restoring reliable deployments for live dealership operations
- Refactored legacy JavaScript to TypeScript and introduced SonarCloud quality gates, reducing production bugs 20%

Software Engineer

Jun. 2021 – May 2023

NeoSOFT Technologies

Mumbai, India

- Audited 500K+ user real estate CRM (400–500ms avg, 2s spikes); designed full architecture and service migration plan; coordinated 20+ engineers over 6 months – 12 services migrated, 7x faster inter-service calls, 45%+ infra cost reduction via AWS rightsizing
- Built REST/GraphQL APIs with PostgreSQL and Redis caching serving 500K+ users, cutting response times 70%; designed JSON-based request/response contracts and Ajax-driven front-end integrations
- Engineered Homepage Builder CMS and multi-tenant CRM using React, Node.js, and AWS Lambda; enabled marketing to independently update pages and promotions, eliminating a recurring engineering bottleneck
- Implemented CI/CD with mandatory tests and New Relic APM dashboards (engineering metrics + stakeholder health view), cutting MTTR from 25 to 15 minutes
- Architected Django analytics engine aggregating per-student classroom data, visualized on Next.js dashboard – enabled teachers to monitor live attendance, quiz scores, and engagement with post-session reports
- Built Open Source boilerplates adopted as org-wide scaffolding standards by 15+ internal teams; mentored 8 junior developers through code reviews and bi-weekly knowledge sharing seminars

RECENT PROJECTS

Healthcare Prior Authorization AI | *Python, FastAPI, Claude API, FHIR R4, MCP, Pinecone, Streamlit*

- Engineered AI system replacing 3–5 day manual insurance reviews with automated decisions in 5–10 sec; built clinical NLP pipeline mapping unstructured notes to FHIR R4 resources with 95%+ extraction accuracy on test dataset
- Designed MCP architecture for context-aware LLM reasoning; system outputs confidence scores with full audit trails enabling reviewers to prioritize high-value claims

CVE Intelligence System | *Go, Node.js, Kafka, Pinecone, Llama 3, AWS EKS, Terraform, Istio*

- Built distributed microservices for real-time CVE ingestion using Kafka streaming; developed RAG pipeline with Pinecone and Llama 3 enabling engineers to query vulnerabilities in plain English instead of manual NVD searches
- Deployed on AWS EKS with Terraform IaC and Istio service mesh; implemented Prometheus/Grafana monitoring with automated alerting and Jenkins CI/CD pipeline
