

MIHIR RAVINDRA ADELKAR

617-487-2363 | adelkar.mihir@gmail.com | linkedin.com/in/mihir-adelkar | github.com/mihiradelkar

Software Engineer with 3+ years building production web applications in JavaScript and TypeScript. Built open-source micro-frontend boilerplate with Webpack MF adopted by 15+ teams, plus reusable component libraries and Node services. Strong foundation in JavaScript, frontend architecture, component design systems, and CI/CD-driven product quality.

EDUCATION

Northeastern University

Master of Science in Software Engineering Systems

Boston, MA

Sept 2023 – May 2025

University of Mumbai

Bachelor of Engineering in Computer Engineering

Mumbai, India

Aug 2018 – Jun 2021

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, HTML5, CSS3, Python, Java, SQL

Frontend: React, Next.js, Redux, Material-UI, Tailwind CSS, SASS, Storybook, Webpack, PWA, SSR/SSG

Testing & Performance: Jest, Cypress, React Testing Library, Lighthouse, Core Web Vitals, WCAG, SonarCloud

Backend & APIs: Node.js, Spring Boot, REST, GraphQL, WebSockets, PostgreSQL, Redis, MCP, RAG

Tools & DevOps: Git, GitHub Actions, Jenkins, Docker, AWS, GCP, EKS, S3, Claude, Figma, ESLint

EXPERIENCE

Full-Stack Developer

KeelWorks Foundation

Aug 2025 – Present

Boston, MA

- Own end-to-end development of KeelCompass, an internal workforce engagement platform; ship React(TS) with Tailwind and Node.js with PostgreSQL microservices, enabling async collaboration in a distributed team
- Implemented PWA features, lazy-loading, and optimized bundle sizes, reducing page load times by 30–35%
- Built reusable component libraries to streamline development and ensure consistency across multiple internal tools
- Built Claude API-powered workflow automation for contextual recommendations and document generation; integrated LLM calls into Node.js services with prompt templates and structured output parsing
- Collaborating with designers and engineers in Agile sprints to ship new features rapidly and iterate on feedback

Software Engineer

Freelancing (Dabadu.ai)

May 2023 – Sep. 2023

Remote

- Built and optimized dealership CRM UIs in React/Next.js, improving navigation speed and user workflows
- Refactored legacy JavaScript to TypeScript, reducing bundle size by 25% and improving maintainability
- Stabilized production services for Dabadu XRM, an automotive dealership CRM with AI-driven lead workflows; resolved defects across Socket.IO real-time chat, Twilio calling, S3 bulk upload, and Firebase push notifications
- Strengthened frontend quality by adding Cypress regression suites and SonarCloud checks, reducing bugs by 20%

Software Engineer

NeoSOFT Technologies

Jun. 2021 – May 2023

Mumbai, India

- Designed responsive React/Next.js UIs with reusable component libraries, improving consistency across 5+ projects
- Engineered Homepage Builder CMS and multi-tenant CRM for Nesto using React, Node.js, and AWS Lambda; enabled non-engineers to update pages and promotions, removing a recurring engineering bottleneck
- Converted legacy applications into PWAs with SSR/SSG, enhancing SEO and reducing page load times by 40%
- Built component library in Storybook and published npm packages, reducing code duplication across teams
- Wrote Cypress/Jest test suites integrated with CI/CD pipelines, achieving 85% UI test coverage
- Ensured WCAG compliance across applications; implemented keyboard navigation and screen reader support
- Optimized Core Web Vitals and implemented A/B testing for UI experiments, improving conversion rates
- Integrated GraphQL and REST backends; adopted React Query for caching, pagination, and optimistic updates

RECENT PROJECTS

Micro-Frontend Architecture Boilerplate | *TypeScript, React, Webpack Module Federation, Jest, Cypress*

- Architected modular micro-frontend system enabling independent deployment of UI components across applications
- Implemented Webpack Module Federation for runtime code sharing, reducing bundle duplication in shared surfaces
- Established comprehensive testing scaffolds with Jest and Cypress; adopted by 15+ teams for production use

Pedgog – Learning Analytics Platform | *Next.js, TypeScript, Django, PostgreSQL, Firebase, AWS S3*

- Developed interactive Next.js dashboards with SSR, improving navigation and retention by 30%
- Built responsive UI components for quizzes and discussion boards to enhance student engagement
- Implemented real-time monitoring with New Relic and K6 load tests to optimize performance and guide autoscaling

Multi-Tenant CRM Platforms (Wasalt/Nesto) | *React, TypeScript, Node.js, Spring Boot, PostgreSQL, Redis, WebSockets*

- Built responsive React/TypeScript frontends for property listings and vendor dashboards with real-time updates
- Implemented Redux state management with optimistic updates and client-side caching for improved UX
- Collaborated with backend teams to integrate REST/GraphQL APIs with proper error handling and loading states
