EDUCATION

Northeastern University

Master of Science in Software Engineering Systems

Boston, MA

Sept 2023 – May 2025

University of Mumbai

Bachelor of Engineering in Computer Engineering

Mumbai, India

Aug 2018 – Jun 2021

TECHNICAL SKILLS

Languages: Python, Go, Java, TypeScript, JavaScript, SQL, Shell, C++

Frameworks: FastAPI, Node.js, Spring Boot, Django, React, Next.js, gRPC, GraphQL

AI & Data: LangGraph, Claude API, RAG, Pinecone, MCP, Kafka, Celery, PostgreSQL, MongoDB, Redis, Elasticsearch

Cloud & Infra: AWS (EKS, Lambda, S3), GCP, Docker, Kubernetes, Terraform, Istio, GitHub Actions, Jenkins, Helm

Observability & Testing: Prometheus, Grafana, New Relic, OpenTelemetry, Jest, Cypress, K6

EXPERIENCE

Software Engineer (AI Systems)

Jun 2026 – Present

AdsAgency AI

San Francisco, CA

- Built end-to-end YouTube video ad generation workflow in LangGraph; clients launch full campaigns to Google Ads in one click from a single brief
- Replaced HTTP polling with Server-Sent Events for real-time job status, cutting system load 70% on long-running generation pipelines
- Parallelized multi-image creative generation in LangGraph via concurrent agent execution, reducing end-to-end time 3x for multi-image ads
- Decoupled generation from the API layer with Celery + Redis async task queues, isolating long-running LLM workloads and improving throughput
- Built ad fraud detection and YouTube campaign management modules (create / pause / budget updates) integrated with the Google Ads API

Full-Stack Developer

Aug 2025 – Jun 2026

KeelWorks Foundation

Boston, MA

- Own end-to-end development of KeelCompass, an internal workforce engagement forum; ship React UI and Node, PostgreSQL microservices enabling async collaboration for a distributed team
- Automated end-to-end deployment pipeline with GitHub Actions on AWS EKS, eliminating manual release steps and unblocking same-day deploys

Software Engineer

Jun. 2021 – May 2023

NeoSOFT Technologies

Mumbai, India

- Audited 500K+ user real estate CRM; designed architecture, flow diagrams, and service migration plan; Configured gRPC/Kafka microservices boilerplate; 12 services migrated, 7x faster service calls, 45%+ infra cost reduction
- Designed GraphQL/REST APIs with PostgreSQL and Redis caching serving 500K+ users, cutting response times 70%; established Jest/Cypress automation reaching 85% test coverage
- Architected Django analytics engine aggregating per-student classroom data, visualized on Next.js dashboard – enabled teachers to monitor live attendance, quiz scores, and engagement during class with post-session reports
- Built Open Source boilerplates - mf-shell (Webpack Module Federation enabling micro-frontend composition) and Console (multi-tenant admin panel with RBAC); adopted as org-wide scaffolding standards by 15+ internal teams
- Implemented CI/CD with mandatory tests and New Relic APM dual dashboards (engineering metrics + stakeholder health view), cutting MTTR from 25 to 15 minutes

RECENT PROJECTS

CVE Intelligence System | Go, Node.js, Kafka, Pinecone, Llama 3, AWS EKS, Terraform, Istio

- Built distributed microservices for real-time CVE ingestion using Kafka streaming; developed RAG pipeline with Pinecone and Llama 3 enabling engineers to query vulnerabilities in plain English instead of manual NVD searches
- Deployed on AWS EKS with Terraform IaC and Istio service mesh; implemented Prometheus/Grafana monitoring with automated alerting and Jenkins CI/CD pipeline

Healthcare Prior Authorization AI | Python, FastAPI, Claude API, FHIR R4, MCP, Pinecone, Streamlit

- Engineered AI system replacing 3–5 day manual insurance reviews with automated decisions in 5–10 sec; built clinical NLP pipeline mapping unstructured notes to FHIR R4 resources with 95%+ extraction accuracy on test dataset
- Designed MCP architecture for context-aware LLM reasoning combining patient data with insurance policy documents; system outputs confidence scores with full audit trails enabling reviewers to prioritize high-value claims
