

MIHIR RAVINDRA ADELKAR

Boston, MA | adelkar.mihir@gmail.com | 617-487-2363 | [LinkedIn](#)

Result-driven Software Engineer with 3+ years of experience in developing web applications, microservices, and event-driven applications. Well-versed in Java, JavaScript, React.js, NodeJS, Kafka, and Spring Boot.

TECHNICAL SKILLS

Programming languages: Java, JavaScript, Python, TypeScript

Frameworks: Spring Boot, Kafka, Node JS, React.js, Next.js, Express, React Native, Redux, GraphQL, Splunk

LLM tools & AI Engineering: LangChain, LangGraph, Prompt Engineering, Agentic Workflows, RAG, MCP, Evaluation Pipelines

Databases: PostgreSQL, MongoDB, Elasticsearch, Oracle

Cloud: Docker, Kubernetes, CI/CD

PROFESSIONAL EXPERIENCE

KeelWorks Foundation | Full Stack Developer

August 2025 - Present

- Developed a customer-facing workforce engagement platform using **React (TypeScript) + Redux** and **Node.js microservices with PostgreSQL**, serving **8K+ active users**, reducing manual workforce coordination effort by **35%** and saving approximately **\$900K annually** in operational costs.
- Designed and published reusable UI component libraries with **Storybook**, establishing coding standards across a distributed team of 12+ engineers, reducing feature development time by **30%**, and preventing an estimated **\$300K/year in engineering duplication costs**
- Implemented **GenAI-powered workflow automation using Claude API**, enabling contextual recommendations and automated summarization that reduced administrative effort by **40%**, increasing task completion efficiency by **25%** and contributing to ~\$650K annual productivity gains.
- Deployed containerized services on **AWS EKS using Docker and Terraform**, and built CI/CD pipelines (Git-based), reducing deployment time by **60%** and release failures by **40%**; optimized Core Web Vitals (LCP, CLS) via code splitting and bundle tuning, improving page load time by **45%** and increasing user engagement by **18%**.

NeoSOFT Technologies | Software Engineer

Jun 2021 - May 2023

- Designed and developed scalable backend systems using **Node.js, Django, and Spring Boot**, supporting CRM, analytics, and e-commerce platforms serving **500K+ users**.
- Built and maintained **RESTful and GraphQL APIs** with PostgreSQL and MongoDB; implemented **Redis caching**, reducing API response times by **70%** under peak traffic.
- Led migration from monolithic architecture to **Docker-based microservices**, reducing deployment time from **2 hours to 25 minutes (90% improvement)** and improving release reliability.
- Implemented **Kafka for asynchronous processing** (notifications, workflow triggers) and **gRPC for low-latency inter-service communication**, improving system scalability and responsiveness
- Established robust CI/CD pipelines by administering **Jenkins infrastructure**, automating configurations using Groovy and JCasC, and provisioning reproducible environments with **Terraform**.
- Enhanced observability with **Prometheus, Grafana, and New Relic**, defining SLIs/SLOs and reducing **MTTR from 25 to 15 minutes** through proactive monitoring and alerting.
- Built automated test frameworks using **Jest and Cypress**, achieving **85%+ test coverage** and integrating unit/E2E tests into CI pipelines to ensure production stability.

EDUCATION

Northeastern University, MS in Software Engineering Systems, Boston, MA.

Sept 2023 - May 2025

University of Mumbai, Bachelor of Engineering, Computer Engineering, Mumbai, India.

Aug 2018 - May 2021

PROJECTS

Healthcare Prior Authorization AI System | FastAPI, MCP, Claude API, FHIR, Streamlit, Tesseract OCR, GCP

Present

- Engineered AI agent system transforming 3–5 day manual prior authorization reviews into automated 5-sec decisions using Model Context Protocol (MCP) architecture with NLP pipeline with FHIR resource mapping with 95%+ accuracy.

CVE Intelligence RAG-Powered Security Assistant | Go, Python, React, PostgreSQL, Jenkins, Ollama, OpenAI

Present

- Built distributed microservices for real-time CVE data RAG pipeline with Pinecone DB, Kafka, Llama 3 LLM for natural language security queries with confidence scoring; deployed on AWS EKS with Terraform, Prometheus monitoring.

Multi-Tenant CRM Platforms (Wasalt/Nesto) | React, SpringBoot, Node, PostgreSQL, Kafka, AWS

Jun 2022 - Jan 2023

- Architected multi-tenant CRM microservices with RBAC supporting 50+ roles with tenant isolation, Kafka event streaming, and gRPC for inter-service communication, handling async processing with Redis caching and responsive UI.
